Mr. Matt Lauber
Product Manager
OPW Retail Fueling
9393 Princeton Glendale Road
Hamilton, Ohio 45011

Dear Mr. Lauber:

In an email dated November 11, 2016, you inquired whether the California Air Resources Board (ARB) has certified an enhanced conventional (ECO) nozzle. In response, ARB has yet to certify an ECO nozzle per Certification Procedure for Enhanced Conventional (ECO) Nozzles and Low Permeation Conventional Hoses for Use at Gasoline Dispensing Facilities (CP-207). Once the ARB certifies an ECO nozzle, an Executive Order will be issued and listed on the ARB vapor recovery web page at <https://www.arb.ca.gov/vapor/eo.htm>. When an Executive Order is issued for ECO nozzles, ARB staff will send an announcement to those who subscribe to the Vapor Recovery list serve email. The list serve email is available to anyone by accessing https://www.arb.ca.gov/listserv/listserv_grp.php?listtype=V0.

If you have questions or need further information, please contact Mr. Pat Bennett at (916) 322-8959 or via email at pat.bennett@arb.ca.gov.

Sincerely,

Michael T. Benjamin, Chief
Monitoring and Laboratory Division

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our website: <http://www.arb.ca.gov>.
